

Geography This is a two-part lesson that you can do over the two weeks.

Lesson 1 is explaining the causes of climate change.

For this use the PowerPoint presentation to support you in understanding the process of the greenhouse effect and secondly identifying where greenhouse gases come from (man-made and natural).

Attached is a blank diagram for the greenhouse effect and you complete by inserting the missing words.

In addition to this is attached a table for children to record the sources of the 4 different greenhouse gas – you can arrange this with headings and sub-headings format.

Missing words:

Space

Greenhouse

Radiation

Earth
