- Caps-Lock
- Enter
- Back-space
- Shift
- Delete

iMovie

iMovie is an Apple based software to record video. The video can then be edited to trim, clip or use filters to improve it.

Digital Footprint

A digital footprint is a trail of information you leave behind when you use the internet. It includes things that can be learnt about you based on the websites you have visited.

Copyright

An original piece of work is covered by copyright. It could be a piece of music, a photo, a book, a film or a piece of software. It is against the law to copy and share this item without the owners permission.

Search Engine & Browser History.

Search engines are used to find information on the internet. Using keywords can help to improve the search. A browser history can be used to see previous searches.

Presenting information

Using PowerPoint to present information that includes digital content. This includes the skill of being able to combine a range of software to improve the presentation and consider the permissions needed to use the content

Online Safety

When online, it is important to stay safe. When using the internet you need to be responsible for your actions. Children learn about the risks of sharing inappropriate images and how to use social networks safely.
