Minimise /Maximise  
Font  
Cursor  
Jpeg  
Pixel  
Resolution  
Search engine  
Internet browser  
Google  
Web  
App  
Landscape / Portrait  
Right click / Left click / Double click  
Caps-Lock  
Enter  
Back -space  
Shift  
Delete

## Cursor

The cursor is the arrow or pointing finger that appears on the screen.

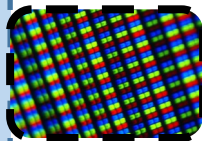

## ipad Apps

iMovie is a video editing app. It can create short films or trailers.

Book Creator can be used to create a book using pictures and video. It can also be used to create a talking book.

## Images

Pixels are tiny squares of colour. Lots of these pixels form digital images.

Images on a computer are often saved as JPEGs.

It saves it so it doesn't take up too much memory when they are stored on the computer.

## Presenting information

Powerpoint software can be used to present information. The skills of cropping and rotating images will be taught alongside searching the internet for the relevant information.

## Online Safety

When online, it is important to stay safe. Showing respect to others, consider behavior online and keeping information secure is discussed in Year 3 & 4.
