

## Reduce, Reuse and Recycle to Enjoy a Better Life (Transcript and pictures from video)

1. Children can make a world of difference.

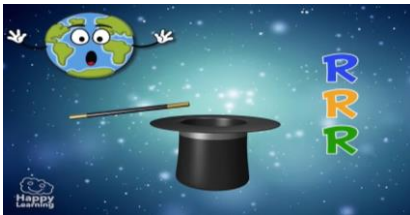

2. Hello! I am the earth. Yep! The very planet you live on.

3. There are three words which start with the letter 'R' which I love. They are Reduce, Reuse and Recycle.

4. Do you know why I love them so much? Because they are almost magical words. They can make all living things, as well as myself, be happier.

5. I said almost magical because without your help, it won't work. They need all of you children in order to do the trick. Each and every one of you are the real three Rs magicians. Those three words can change the world. Do you want to know how? Yes? Well let's find out!

6. The first R is for Reduce. If you don't think about it, there are many things that you don't need. When you go to the supermarket, I am sure you can take your own canvas bags instead of using disposable ones given to you.

7. Like that, you will be reducing the amount of plastic which is very contaminating.

8. And I'm sure that you don't need to print out so many documents or photos nor leave lights, television, or computers on when you're not using them.

## Reduce, Reuse and Recycle to Enjoy a Better Life (Transcript and pictures from video)

9. If you remember this, you'll be reducing the amount of paper being used as well as energy and in turn, will be helping to reduce the contamination. These are just a few examples and I'm sure you can think of many more.

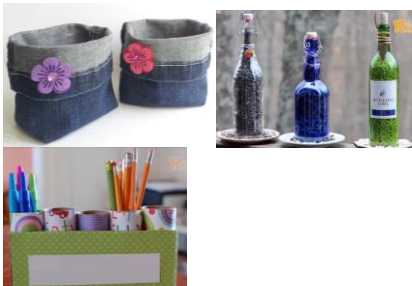

10. The second R is for Recycle. Now it is easier than ever for us to recycle things that we don't need any more so that they can be reused. Near your home you can find places like the recycling station and containers for cans, plastic, paper or organic waste.

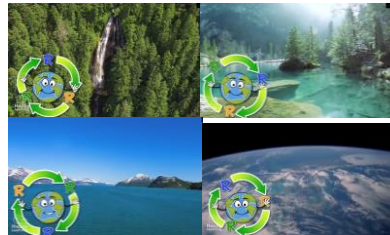

11. They each have specific colours to make it easier to identify. By using the you will have avoided contaminating nature, the river and seas as well as the atmosphere, which is the air we breathe.

12. And finally we have the third R which refers to Reuse. How many things do you we can reuse again and again instead of throwing them away? Let's see. A piece of paper that has one side printed on, a cardboard box, a plastic bottle.

13. You think now. With just a little bit of imagination I'm sure you can come up with many more exciting and fun, new uses for them.

14. And remember, if you apply the three Rs rule, you will make me a much cleaner planet. With less contamination and where we can all enjoy a better life.

15. Because as you know, children can make a world of difference.
