

## There are three main types of geography:

Human geography

Physical geography

Environmental geography

## Match up the terms with the definitions:

Human geography

Natural features or events. Including landforms and weather.

Physical geography

Human and physical geography linked together. Including environmental pollution.

Environmental geography

Where and how people live.

# Human geography

Humans have an enormous effect on the world. What are our main activities? How many can you think of?

# Physical geography

Imagine a world without humans. What would remain?

# Environmental geography

- The environment is very delicate.
- Are we destroying the planet?

Is this physical, human or environmental geography?

Answer \_\_\_\_\_

Answer \_\_\_\_\_

Label the picture to indicate which are physical, human or environmental geography? Remember to look at the definitions.

Is this physical, human or environmental geography?

Is this physical, human or environmental geography?

Task – cut and stick the picture on the next page under the correct headings on the table below. (If you have not got glue then just write the word.)

Human geography	Physical geography	Environmental geography

Earthquake

Factory

Roads

Cities

Rain

River

Waste

Airport

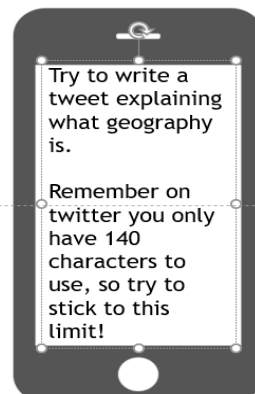

Farm

Mountain

**Task 2**

Try to write a tweet explaining what geography is.

Remember on twitter you only have 140 characters to use, so try to stick to this limit!

Disease

Global warming
