

There are three main types of geography:

Human geography

Physical geography

Environmental geography

Match up the terms with the definitions:

Human geography

Natural features or events. Including landforms and weather.

Physical geography

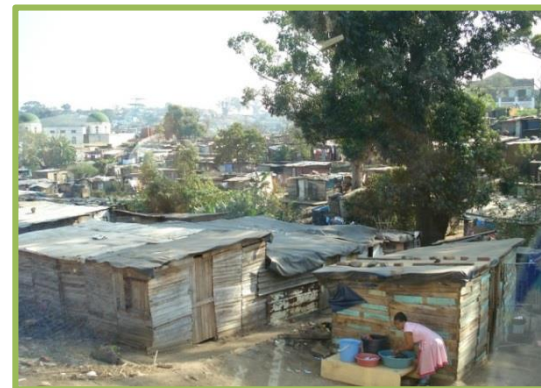

Human and physical geography linked together. Including environmental pollution.

Environmental geography

Where and how people live.

Human geography

Humans have an enormous effect on the world. What are our main activities? How many can you think of?

Physical geography

Imagine a world without humans. What would remain?

Environmental geography

- The environment is very delicate.
- Are we destroying the planet?

Is this physical, human or environmental geography?

Is this physical, human or environmental geography?

Is this physical, human or environmental geography?

Is this physical, human or environmental geography?

Draw the following table into your book:

Human geography	Physical geography	Environmental geography

Look at the following pictures. Decide which category they fit into (it might be more than one).

Add it to your table.

Roads

Rain

Cities

Factory

River

Pollution

Building

Airport

Farm

Waste

Trees

Litter

Earthquake

Disease

Global warming

Seaside

Mountain

School

Grass

Volcano

Try to write a tweet explaining what geography is.

Remember on twitter you only have 140 characters to use, so try to stick to this limit!

Odd one out

1.

river

mountain

school

2.

desert

house

factory

3.

motorway

farm

oil slick

4.

aeroplane

internet

road

5.

sewage

dirty beach

house

Odd one out

6. chewing gum car crisp packet

7. sun winter cloud

8. nature reserve quarry city

9. village city earthquake

10. volcano desert earthquake
