

A Dragon and Unicorn Zoo

Year 4 Area and Perimeter

Use the squared paper below to create your own dragon or unicorn zoo (or include a mixture of both dragons and unicorns). You must draw a paddock for each creature and calculate the area and perimeter for each one. Write the area and perimeter below each paddock. Also, think about what type of dragon or unicorn may go in each paddock, for example the Rainbow Tails, the Chinese Spitfires, the Gold-Winged Unicorns – just use your imagination!
